- (b) The consultation shall take place as soon as it is practicable after the employer has made a decision which will invoke the provisions of clause 10.2(a) and shall cover the reasons for the proposed terminations and measures to avoid or minimise the terminations and/or their adverse effects on the employee/s concerned.
- (c) For the purpose of the consultation the employer shall, as soon as practicable, provide in writing to the employee/s concerned and, where relevant, their Union/s, all relevant information about the proposed terminations including the reasons for the proposed terminations, the number and categories of employees likely to be affected, the number of workers normally employed and the period over which the terminations are likely to be carried out.

 - (iii) any other amounts payable under the employee's employment contract.

- (a) An employee given notice of termination in circumstances of redundancy must be allowed up to one day's time off without loss of pay during each week of notice for the purpose of seeking other employment.
- (b) If the employee has been allowed paid leave for more than one day during the notice period for the purpose of seeking other employment the employee must, at the request of the employer, produce proof of attendance at an interview or the employee will not receive payment for the time absent.  - (i) the continuity of the employment of the employee shall be deemed not to have been broken by reason of such transmission; and
 - (ii) the period of employment which the employee has had with the transmittor or any prior transmittor shall be deemed to be service of the employee with the transmittee.
- (b) In clauses 10.6 and 10.7, 'business' includes trade, process, business or occupation and includes a part or subsidiary (which means a corporation that would be taken to be a subsidiary under the Corporations Law, whether or not the Corporations Law applies in the particular case) of any such business and 'transmission' includes transfer, conveyance, assignment or succession whether by agreement or by operation of law and 'transmitted' has a corresponding meaning.

10.7 Exemption where transmission of business

PART 11 - Workload Management

39. Workload management - Business Planning Framework (BPF)

39.1 Overview

- (a) The Business Planning Framework: a tool for nursing workload management (BPF), and any agreed variations, is the tool for managing nursing and midwifery resources and workload management. The BPF is the agreed methodology for the resolution of disputes regarding workload and safe staffing levels. The parties also recognise that professional judgement is a valid criterion for deeming a definitive staffing level of nurses and midwives as being safe.
- (b) The business planning approach to nursing/midwifery resource management focuses on achieving a balance between service demand and the supply of nursing resources necessary to meet the identified demand.
- (c) The service profile will detail hours per patient day (or occasions of service where relevant) in each clinical unit and will be varied in accordance with changing acuity and activity. Notional, ward/unit based nurse:patient ratios will be defined. Patient safety and sustainable workloads will be the guiding principles in defining the nursing/midwifery hours required.
- (d) The BPF will be used daily to identify minimum, consistent and enforceable nursing/midwifery hours per patient day (or per occasion of service) for clinical units on a shift by shift basis.
- (e) A maximum number of available beds per clinical unit will be calculated by reference to the rostered productive hours and the Nursing Hours per Patient Day (NHPPD) for the clinical unit on any particular day.
- (f) Bed availability will be defined at the clinical unit level in accordance with the productive nursing hours available.
- (g) Any bed closure will occur within the context of the integrated bed management arrangements of the facility.
- (h) Training in the application of the BPF will be provided to develop specialists in the application of the tool across all facilities under the guidance of a dedicated project officer.

39.2 Nursing Workload Committee

The Department and each hospital and health service will establish a joint employer/Union workloads committee (a Steering Committee or Nursing Consultative Forum can be agreed alternatives) to deal with issues of nursing/midwifery workload management. The committee or consultative forum will provide specialist advice, training and workload management review in relation to the local application of the tool and with grievances or disputes relating to its application.

39.3 Workloads management concern escalation process

- (a) This is the process for the resolution of workload concerns including those that may impact on patient and staff safety. Any nurse, midwife, employer or union representative may raise a workload concern.

- (b) Where a workload concern creates an immediate and substantial risk to the safety of patients or staff, the parties will work together to address the concern as a matter of urgency by immediate escalation to stage 3.
- (c) **Stage 1**
- (i) Where a nurse/midwife identifies a workload concern, it will be raised immediately at the service level with the line manager responsible for ensuring the BPF has been correctly applied.
 - (ii) The parties will engage to resolve the concern within 24 hours.
 - (iii) The line manager or after-hours nurse/midwife manager is responsible for immediately investigating the workload concern identified and implementing actions (including implementing service agreed low priority strategies) to resolve the identified concern, mitigate risk to patient safety and/or prevent reoccurrence.
- (d) **Stage 2**
- (i) If the workload concern is not resolved at the service level at Stage 1, it may be escalated for discussion between the nurse/midwife, union representative and Nursing/Midwifery Executive team (that is Nurse Grade 9 and above depending on the nursing executive structure of the facility).
 - (ii) The parties will review the identified workload concern and determine and implement further actions to resolve the concern, mitigate risk to patient safety and/or prevent re-occurrence, within seven days of the workload concern being referred to Stage 2.
- (e) **Stage 3**
- (i) If the workload concern is not resolved at Stage 2, the nurse/midwife, employer and/or union representative party may escalate for resolution.
 - (ii) Resolution will be by discussion between the Executive Director of Nursing/Midwifery, or when a workload concern is within the Department the professional lead equivalent, and union representative.
 - (iii) Discussions will be held within seven days of the concern being escalated to Stage 3 by any party to the concern.
 - (iv) The workload concern should also be tabled for reporting purposes to the next immediate Workload Management Committee / Nursing Consultative Forum.
- (f) **Stage 4**
- (i) If the workload concern is not resolved at Stage 3, a specialist panel must be convened by the Hospital and Health Service Executive Director of Nursing/Midwifery or Department equivalent within seven days (or longer as agreed by the parties) of the concern being escalated from Stage 3 by a party to the concern.
 - (ii) The specialist panel will be made up of the following nominees:

- (iv) The recommendations of the specialist panel meeting must be published and feedback on the actions taken and those actions to be taken must be provided to staff affected by the identified workload concern within three days of the conclusion of the panel's deliberations.

(g) **Stage 5**

- (i) If the workload concern is not resolved at stage 4, a party to the concern may refer the matter to the QIRC for conciliation and if necessary arbitration.
- (ii) For the purposes of this stage, an unresolved concern may include but is not limited to instances where the specialist panel is unable to reach an agreed position or the recommendations of the specialist panel are not implemented or are only partly implemented.

S2.2 Definitions

NMBA means Nursing and Midwifery Board of Australia

Scope of practice for a Nurse Practitioner means the scope of practice as defined in the NMBA.

Specialist means a nurse or midwife who is recognised for their breadth of knowledge or skill within their specialised area of practice. This definition differs from the recognised definition under the Australian Health Practitioners Registration Authority which restricts the use of the term by national law.

Specialised means a more focused area of practice where the nurse or midwife works with a discrete patient/client group in a defined setting.

Supervision means, subject to the Codes and Guidelines of NMBA, the oversight, direction, instruction, guidance and/or support provided to an employee by a registered nurse or midwife. The registered nurse or registered midwife is responsible for ensuring such an employee is not placed in situations where they would be required to function beyond the employee's preparation and competence.

Specifically:

- (a) **direct supervision** means the employee works side by side continuously with a registered nurse/registered midwife responsible for observing and directing the employee's activities in circumstances where, in the judgement of the registered nurse/registered midwife, such an arrangement is warranted in the interests of safe and/or effective work practice;
- (b) **indirect supervision** means supervision where the delegating and supervising registered nurse or midwife is known to the person being supervised by name and is readily contactable and accessible, but does not constantly observe the person performing the activity. The supervisor must be available for reasonable access. What is reasonable will be dependent upon the context of care, the context of the patient and the competence of the person performing the care.

Schedule 3 - Midwifery Models of Care

S3.1 Models of care definitions

- (a) **caseload care** is a model of maternity care where women have a primary midwife assigned to them through pregnancy, labour and birth and the postnatal period. Each midwife has an agreed number (caseload) of women per year and acts as a second or “back up” midwife for women who have another midwife as their primary carer. Caseload midwives usually work on a 24-hour on call basis (this may be organised within a group).
- (b) **caseload** means the number of women carried by each midwife in a caseload model.
- (c) **core midwives** work rostered shifts to provide midwifery care within a facility and may be rostered on call in accordance with clause 18.2.
- (d) **midwifery group practice (MGP)** is the organisational unit in which caseload midwives usually work. The purpose of the MGP is to support the practice of the caseload midwives within it and to facilitate communication with the MGP and with management. A MGP is one or more groups of two or three caseload midwives working together. Each pair of group of three may work with other pairs or groups of three to support matters such as emergent leave and periods of fatigue but this does not extend to routine on call.
- (e) **primary midwife** is the midwife who provides the majority of midwifery care and is the woman’s maternity care coordinator. Each woman receiving the caseload midwifery care will have a primary midwife. ‘Known midwife’ and ‘named midwife’ have the same meaning as ‘primary midwife’.
- (f) **team midwifery** is a model of maternity care where a team of up to eight midwives provide care to a group of women. Team midwives work in shifts, and rotate across the antenatal, intrapartum and postnatal stages of care. On call periods are rostered across the whole team. Team midwives are not eligible for annualised salary in accordance with this schedule.

S3.2 Local arrangements for caseload midwifery

- (a) Before a midwifery model of care is developed in a facility, a working group should be established.
- (b) The working group should include representative midwives, the employer, the Queensland Nurses and Midwives’ Union (QNMU) and other key stakeholders formed under the governance of the Nursing and Midwifery Consultative Forum (NaMCF).
- (c) The working group should take into consideration consumers’ and community needs.
- (d) Each Hospital and Health Service will develop local agreements to support the midwifery caseload model of care.
- (e) Each Hospital and Health Service will review and analyse the service provided on an ongoing basis. The review process should be built into the local agreements.
- (f) Local agreements must be sent to the QNMU for final review before it is signed by the relevant Hospital and Health Service and the QNMU.

S3.3 Industrial arrangements

(a) Participation

- (i) Participation in a caseload midwifery model of care will be voluntary, except as provided at S3.3(a)(ii).
- (ii) If a midwife is appointed to a position as part of a midwifery caseload model under this agreement and there is no core midwifery service in the hospital, the midwife will be a permanent employee of the midwifery caseload model.

(b) Reversion

- (i) Midwives who participate in a caseload midwifery model may revert to a core or team midwifery position if there is a suitable vacant position.
- (ii) In such cases the midwife should provide 4 weeks' notice of their intention to return to the core midwifery service, unless otherwise agreed.

(c) Caseload

- (i) The caseload for a full-time midwife working an average of 38 hours per week will be up to 40 clients in a 12 month period.
- (ii) The caseload of a midwife may vary depending upon the nature of the midwifery service, geography, the skill mix of the midwives within the midwifery service and the risk profile of the women (for example: indigenous women, women of psycho-social disadvantage or women with other complexities). Accordingly, the determination of specific caseloads will be determined during the consultation for the local agreement.

(d) Annualised salary

- (i) Midwives working in a midwifery model are to be paid an annualised salary to provide appropriate remuneration for the flexible patterns of work.
- (ii) The annualised salary is the ordinary rate of pay as set out in clause 12.2 and an all purpose loading of 35%, which is in compensation for ordinary hours worked and for the following:
 - A. public holiday penalty rates;
 - B. Saturday shift penalty rates;
 - C. Sunday shift penalty rates;
 - D. afternoon shift penalty rates;
 - E. night shift penalty rates;
 - F. meal allowances relating to overtime;
 - G. overtime payments, except as provided for in clause S3.3(f), (excess hours), including recall payments;
 - H. on call allowances; and
 - I. annual leave loading on 5 weeks' annual leave.
- (iii) The adequacy of the annualised salary loading may be reviewed in accordance with criteria between the parties.
- (iv) Midwives working in a team or core midwifery model are not eligible for an annualised salary.

(e) Patterns of work

- (i) Caseload midwives will organise their own hours of work in consultation with their line manager to ensure that the needs of the women and the organisation are met.
- (ii) Midwives will schedule and hold clinics at a time that suits their workload.
- (iii) Midwives will not be required to work for periods longer than 8 hours and can choose to hand over care of the woman at that time. The midwife will have the discretion to work up to, but not longer than, 12 hours to meet the needs of the woman.

- (iv) Each midwife will have a period of at least 8 hours, within any 24 hour period, continuously free of duty other than on call and recall.
 - (v) Each midwife will have an average of 4 days off duty per fortnight, free of planned work and on call or recall. At least two of these days must be consecutive.
 - (vi) Midwives will not be permitted to work for more than 7 days in succession other than where the midwife is recalled to work.
- (f) On call arrangements
- (i) On call/recall applies to the day/night cover by a caseload midwife for their allocated women, or to assist/relieve for another caseload midwife.
 - (ii) Caseload midwives will generally be on call for their own women except for days off as provided at S3.3(e)(v). However, a midwife may enter into a reciprocal arrangement with another midwife in the MGP with the same or similar caseload to manage their caseloads in a way that is mutually agreed.
 - (iii) A caseload midwife will not be rostered to work or be on call in the core maternity service except in specific circumstances described in the Local Agreement, such as to cover emergency maternity presentations or theatre in rural facilities or other roles.
- (g) Excess hours
- (i) The hours of work will be averaged over an 8 week cycle. The first 30 hours worked in excess of 304 hours in an 8 week cycle will be taken as time off in lieu (TOIL). Hours worked in excess of 334 will be paid at the overtime rate of time and a-half for the first 3 hours and double time thereafter. The midwife may elect to take TOIL instead of overtime payments.
 - (ii) A maximum of 30 hours TOIL may be carried from one 8 week cycle to the next. The line manager of midwifery may approve TOIL above 30 hours in exceptional circumstances, provided the hours in excess of 30 are taken in the next work cycle.
- (h) Debit carryover
- A maximum TOIL debit of 16 hours is allowed at any one time and may be carried over from one 8 week cycle to the next.
- (i) Time records
- Midwives will be required to keep accurate records of all time worked including travel time, administrative work, staff development and other non-clinical activity.
- (j) Review of workloads
- Where a midwife works above or below the accepted range of hours (288 hours to 334 hours) the line manager of midwifery is to review the midwife's hours of work and ensure that future hours do not fall above or below the accepted range of hours which underpin the annualised salary.
- (k) Annual leave
- Annual leave is 6 weeks per year and the all purpose loading provided in S3.3(d) is paid for the entire period of leave.
- (l) Part-time case load midwives
- (i) Part-time caseload midwives will be designated a caseload on a pro rata basis.
 - (ii) Clause S3.3(g), (h) and (i) apply to part-time midwives on a pro rata basis.
