- (b) The consultation shall take place as soon as it is practicable after the employer has made a decision which will invoke the provisions of clause 10.2(a) and shall cover the reasons for the proposed terminations and measures to avoid or minimise the terminations and/or their adverse effects on the employee/s concerned.
- (c) For the purpose of the consultation the employer shall, as soon as practicable, provide in writing to the employee/s concerned and, where relevant, their union/s, all relevant information about the proposed terminations including the reasons for the proposed terminations, the number and categories of employees likely to be affected, the number of workers normally employed and the period over which the terminations are likely to be carried out.

For this purpose a statutory declaration will be sufficient.
- (c) Clause 10.5 applies instead of clause 9.4 in cases of redundancy.

10.6 Transmission of business

- (a) Where a business is, whether before or after the date of commencement of this Award, transmitted from the employer (transmittor) to another employer (transmittee) and an employee who at the time of such transmission was an employee of the transmittor of the business becomes an employee of the transmittee:
 - (i) the continuity of the employment of the employee shall be deemed not to have been broken by reason of such transmission; and

Clauses 10.1 to 10.8 shall not apply:

- (a) where employment is terminated as a consequence of misconduct on the part of the employee; or
- (b) to an employee engaged for a specific period or task/s; or
- (c) to a casual employee; or
- (d) to an employee with less than one year's continuous service, in which case the general obligation on the employer should be no more than to give the relevant employee an indication of the impending redundancy at the first reasonable opportunity and to take such steps as may be reasonable to facilitate the obtaining by the employee of suitable alternative employment.

Schedule 1 - Classification Structure and Level Descriptors - Building Trades Stream

S1.1 Outline of classification structure

The definitions below guide the classification of employees in this group by indicating the standard of skill and indicative tasks required of a particular role.

Building trades employees at each classification level may be required to have the competencies for the level or levels below their own level. When required, employees at each level will undertake lower level duties as well as performing tasks incidental to work at their level.

S1.2 Definitions

Definitions for the purpose of determining classifications of employees within the Building trades stream:

points means the points assigned to an employee who successfully completes units of competence within a qualification that may lead to the issue of a statement of attainment. One (1) point is the equivalent of each 10 hours of time nominally assigned from the unit/s or element/s of competence undertaken

recognition of prior learning (RPL) means recognition of competencies currently held, regardless of how, when or where the learning occurred. Under the Australian Quality Training Framework, competencies may be attained in a number of ways. This includes through any combination of formal or informal training and education, work experience or general life experience. In order to grant RPL, the assessor must be confident that the candidate is currently competent against the endorsed industry or enterprise competency standards or outcomes specified in Australian Qualifications Framework accredited courses. The evidence may take a variety of forms and could include certification, references from past employers, testimonials from clients and work samples. The assessor must ensure that the evidence is authentic, valid, reliable, current and sufficient

self-directed work area team or WAT means a group of employees who work as a team to plan and execute functions relevant to their employers' business. Work area teams are generally autonomous of direct managerial supervision and perform their tasks in a way that maximises productivity and the utilisation of skills

supervision within the classification structure relates to the increasing value of the employee to the employer in terms of the degree of autonomy, decision-making, problem-solving application and responsibility of the employee as an individual or within a work area team environment. This Award recognises two levels of supervision which are as follows:

general supervision applies to an employee who:

- receives general instructions, usually covering only the broader technical aspects of the work;
- may be subject to progress checks but such checks are usually confined to ensuring that, in broad terms, satisfactory progress is being made;
- has their assignments reviewed on completion;
- although technically competent and well experienced there may be occasions on which the person will receive more detailed instructions; and
- usually operates within a work area team but may have specified areas of autonomy to perform a range of allocated activities and functions.

limited supervision applies to an employee who:

- receives only limited instructions normally confined to a clear statement of objectives;
- has their work usually measured in terms of the achievement of stated objectives;
- is fully competent and very experienced in a technical sense and requires little guidance in the performance of work; and
- may lead or manage a work area team.

Schedule 2 - Classification Structure and Level Descriptors - Engineering Stream**S2.1 Summary**

Employees in this group are to be classified according to the level of competency they hold and are required to use in their work. The classification definitions provide descriptors of the nature of the work performed at each classification level. Where there is a query about the classification of an employee, their classification should be determined in accordance with the National Metal and Engineering Competency Standards Implementation Guide (Implementation Guide). A copy of the guide can be downloaded at www.mskills.com.au.

Competency can be shown by formal qualifications or by the actual exercise of skills. If an employee holds the minimum training requirement for a particular classification level in this Award, and they are required by the employer to use or will be required by the employer to use those skills in their job, then they cannot be classified below that particular classification level. For example, a person who holds a trade certificate and is required to use those skills cannot be classified below the C10 classification.

The classification structure can be summarised as follows:

- (b) The employer may instruct an employee not to exercise competencies that they possess. In such a case, an employee cannot seek reclassification for possessing such competencies.

S4.1.2 Progression through the trade classification structure

- (a) Upward progression for tradespersons through the classification structure will be facilitated through the process of re-classification. Employees will be provided the opportunity to be re-classified as they develop skills and appropriate to the requirements of the employer.
- (b) Progression through the classification structure can be achieved by the following processes:
 - (i) All trade employees shall commence at the 100% classification level. To achieve this level, the employee must hold an existing AQF Level 3 trade certificate, or have been assessed as competent in all core and the minimum number of elective competencies for the designated trade.
 - (ii) Acquisition of 12 "points" from outside their own trade at the Certificate 3 level or higher, in addition to the requirements of the employees' current level. This is equivalent to 120 nominal hours of accredited training. The acquisition of 12 points will result in the employee advancing one level higher than their current classification level. The employee shall advance one level for each 12 points acquired up to BT3 level.
 - (iii) Acquisition of 12 "points" of specialist post trade competencies in the employees own trade at AQF level 4 or higher (including specific licenses and endorsements for plumbers provided in the classification structure), in addition to the requirements of the employees' current level. This is equivalent to 120 nominal hours of accredited training. The acquisition of 12 points will result in the employee advancing one level higher than their current classification level. The employee shall advance one level for each 12 points acquired up to BT3 level.
 - (iv) The assessed competencies must be relevant to the work being performed and required by the employer.
 - (v) Competencies may be drawn from other trade qualifications.

S4.1.3 Classification Disputes Procedure

- (b) Where it is identified that trade employees are required to use skills that are beyond the scope of their designated core trade, the employer shall ensure that a skills assessment is conducted to accurately determine the employees' competence in those skills so that the extra skills required can be formally recognised for the purpose of reclassification.
- (c) The employer shall be responsible for any costs associated with the skills assessment process. Results of skills assessments shall remain the property of the employee. Employees shall provide the results of skills assessments to the employer as required

S4.1.5 Multi skilling

- (a) Multi-skilling facilitates employees working in non-traditional work areas and requires trades staff to perform duties and use skills that are not a part of their designated core trade. Higher skill levels may be beneficial to business operation and it is acknowledged employees should be remunerated according to the skills they are required to use. The reclassification process provides for wage levels to be determined according to skill levels with higher wages available to employees who are required to have and use the necessary competencies.
- (b) Employees who wish to progress through the classification structure may be required to up-skill and or cross-skill to meet the requirements of higher classification levels. Skills may be acquired from a variety of occupational areas. The business needs of the enterprise shall determine the skills required beyond the scope of the existing trade qualifications.

- (d) Where the employee has a relevant qualification recognised as a minimum training requirement for the level at which the employee seeks to be classified and the employee is exercising or will be required to exercise the skills and knowledge gained from that qualification necessary for that level of work the employee shall be classified appropriately. It is up to the employer to demonstrate reasons for a qualification that is a recognised minimum training requirement not being regarded as relevant for an employee's work.
- (e) Where skill standards have not been finalised in respect of any class of work and this is necessary for determining an employee's classification, the employee shall be classified in accordance with the classification definitions at Schedule 2 of this Award.
- (f) All employees engaged under the Award at the relevant classification levels shall be subject to the metal and engineering competency standards.
- (g) Other provisions to be followed where competency standards are being implemented in an enterprise:
 - (i) Management and employee representatives responsible for overseeing the implementation of competency standards within enterprises shall be given access to briefing and/or training courses on the standards prior to implementation.
 - (ii) Such briefings/training courses on the metal and engineering competency standards and Implementation Guide should be approved by MSA. These briefings/training courses can be either a joint briefing delivered by the parties or by one party with the approval of other relevant parties at the enterprise or an approved course delivered by a MSA recognised provider with the approval of the relevant parties at the enterprise level.

S5.5 Any casual employee who has a right to elect under clause S5.1, upon receiving notice under clause S5.2 or after the expiry of the time for giving such notice, may give 4 weeks' notice in writing to the employer that the employee seeks to elect to convert the employee's contract of employment to full-time or part-time employment, and within 4 weeks of receiving such notice the employer shall consent to or refuse the election but shall not unreasonably so refuse. S5.8 By agreement between the employer and the majority of the employees in the relevant workplace, or section of it, or with the casual employee concerned, the employer may apply clause S5.1 as if the reference to 6 months is a reference to 12 months, but only in respect of a currently engaged individual employee or group of employees. Any such agreement shall be recorded in the time and wages records. Any such agreement reached with an individual employee may only be reached within the 2 months prior to the end of the period of 6 months referred to in clause S5.1.

- (e) the contingency on which the engagement expires, or the notice, if any, that will be given to terminate any ongoing employment.

S5.11 It shall be sufficient compliance with clause S5.10 if the employer gives such a note in writing upon or following the first occasion on which the casual employee has been so engaged for a period or periods extending over 3 or more weeks in any calendar month.

- i. During the first year of an apprenticeship, tools to the prescribed value of the prescribed *supply of tools amount* shall be supplied within a period of three (3) months after the expiry of the probationary period or within a period of six (6) months from the date of commencement of the employment whichever first occurs;
 - ii. During the second and subsequent years (or part of a year) of an apprenticeship, tools to the prescribed annual retail value of the *supply of tools maintenance amount* shall be supplied within a period of three months from the commencement date of each year (or part of a year) of the indentured apprenticeship.
- (f) In lieu of the aforesaid requirements of paragraph (e), an employer may, within a period of three months following the date of signing of the indenture supply to an apprentice, during the first year of the apprenticeship, tools of trade to a value equivalent to that prescribed by this Schedule for the full term of the apprenticeship. Such supply of tools made on or after the commencement date of this Schedule will satisfy in full the requirements thereof.
- (g) Provided that where prior to the date of operation of this Schedule an apprentice has been supplied with tools of trade to the value equivalent to that prescribed by a relevant Regulation for the full term of the apprenticeship, the apprentice shall, in respect to each year of such apprenticeship commencing on or after the date of this Schedule, be supplied with tools to the additional value resulting from ascertaining the difference between the annual value prescribed by this Schedule and the imputed annual retail value at the time of original supply.
- (h) Where an apprentice has entered a Competency Based Training Agreement, the provision of tools in accordance with this Schedule will be on the following basis:
- i. During the term of apprenticeship, an employer shall, in respect of each level of the apprenticeship program, supply the apprentice with tools of trade, equivalent to the *supply of tools amount* in the first level of the program, and the *supply of tools maintenance amount* for each level thereafter or 12 months after commencing the relevant level (whichever is the earlier), as prescribed for the trade in paragraph (b) above.
 - ii. The supply of tools of trade for each level of the program shall be linked to the successful achievement of competencies or, where appropriate, the demonstration of approved levels of progression towards the achievement of competencies as prescribed by the relevant Training Package or in this Award.
 - iii. Supply of tools will occur no later than three (3) months after the expiry of the probationary period or within a period of six (6) months from the date of commencement of the employment, whichever first occurs, and no later than three (3) months into subsequent levels of the apprenticeship.
 - iv. Apprentices employed under part-time or school based arrangements shall be entitled to a supply of tools consistent with the requirements as outlined in sub-paragraphs (i), (ii) and (iii) above. This Schedule takes cognisance of the relevant probationary period requirements for school based apprentices.

S9.17 Ownership of tools supplied pursuant to this schedule

- (a) Except as otherwise provided herein, all tools of trade issued to an apprentice by an employer in terms of this Schedule shall become and remain the property of the apprentice and are to be available and used in performing trade work as required by the employer.
- (b) Provided that should an apprentice on probation who has been supplied with tools of trade pursuant to this Schedule not proceed to an indentured apprenticeship, such tools shall revert to the employer, or alternatively, the value of such tools (calculated at the actual supplied cost) shall be refunded by the apprentice to the employer on demand.
- (c) Should an apprentice who has been supplied with the total requirements of tools pursuant to clause S9.16(f) hereof not complete the apprenticeship term with that employer then, in respect of any uncompleted portion of the apprenticeship term, the pro rata value of tools supplied (calculated at the actual supplied cost) shall be refunded by the apprentice to the employer on demand.

S9.18 Payment for course time

- (a) In accordance with the provisions of s 372 of the Act, time spent by an apprentice or trainee in undertaking an approved course of instruction, up to the maximum number of hours specified in the approval, is taken to be time worked for the employer and ordinary hours when calculating wages and employment conditions for the apprentice or trainee.
- (b) In accordance with the provisions of s 339(1)(h) of the Act, the employer shall include particulars necessary to show compliance with payment for course time in the time and wages records.
- (c) Where an apprentice or trainee's rostered day off, or days off, coincide with attendance at an approved course of instruction, the rostered day off shall not be a rostered day off for the apprentice or trainee and they shall be afforded another ordinary working day off as a substitution for the rostered day off.

S9.19 Attending training

- (a) An apprentice or trainee is entitled to be released from work without loss of continuity of employment and to payment of the appropriate wages to attend any training and assessment specified in, or associated with, the Training contract.
- (b) Time spent by an apprentice or trainee in attending any training and/or assessment specified in, or associated with, the Training contract is to be regarded as time worked for the employer for the purposes of calculating the apprentice or trainee's wages and determining the apprentice or trainee's employment conditions. This clause operates subject to the provisions for School-based apprentices or trainees.
- (c) No apprentice or trainee will, except in an emergency, work or be required to work overtime or shift work at times which would prevent their attendance at training consistent with their Training contract.

S9.20 Training costs—fees and textbooks

- (a) All fees charged by an RTO and the cost of all prescribed textbooks for the apprenticeship or traineeship, which are paid by an apprentice or trainee, will be reimbursed by the employer within:
 - i. 6 months of commencement of the apprenticeship or traineeship or a stage of the apprenticeship or traineeship; or
 - ii. within 3 months of the commencement of training provided by the RTO, whichever is the later, unless there is unsatisfactory progress.

S9.21 Excess travel costs for block release training

- (a) Where an apprentice is required to attend block release training for training identified in or associated with their Training contract, and the training requires an overnight stay, the employer must pay for the excess reasonable travel costs incurred by the apprentice in the course of travelling to and from such training.
- (b) This clause will not apply where the apprentice could attend an alternative RTO and the use of the more distant RTO is not agreed between the employer and the apprentice.
- (c) For the purposes of this clause excess reasonable travel costs include the total cost of reasonable transportation (including transportation of tools where required), accommodation costs incurred while travelling (where necessary) and reasonable expenses incurred while travelling, including meals. For the purposes of this clause excess travel costs do not include payment for travelling time or expenses incurred while not travelling to and from block release training.
- (d) The amount payable by an employer under this clause may be reduced by an amount the apprentice is eligible to receive for travel costs to attend block release training under a Government apprentice assistance scheme. This will only apply if an apprentice has either received such assistance or their employer has advised them in writing of the availability of such assistance.

S9.22 Competency based progression

- (a) For the purpose of competency-based wage progression in this Schedule, an apprentice or trainee will be paid at the relevant wage rate for the next stage of their apprenticeship or traineeship if:
 - i. competency has been achieved in the relevant proportion of the total units of competency specified in this Schedule for that stage of the apprenticeship or traineeship, and the units of competency, which are included in the relevant proportion, must be consistent with any requirements in the Training plan; and
 - ii. any requirements of the State Training Authority and any additional requirements of the relevant training package with respect to the demonstration of competency and any minimum necessary work experience requirements are met; and
 - iii. either:
 - 1. the RTO, the employer and the apprentice or trainee agree that the abovementioned requirements have been met; or
 - 2. the employer has been provided with written advice that the RTO has assessed that the apprentice or trainee meets the abovementioned requirements in respect to all the relevant units of competency and the employer has not advised the RTO and the apprentice or trainee of any disagreement with that assessment within 21 days of receipt of the advice.
- (b) If the employer disagrees with the assessment of the RTO referred to in paragraph (a) iii. 2. above, and the dispute cannot be resolved by agreement between the RTO, the employer and the apprentice or trainee, the matter may be referred to the State Training Authority for determination. If the matter is not capable of being dealt with by the State Training Authority, it may be dealt with in accordance with the dispute resolution clause in this Award. For the avoidance of doubt, disputes concerning other apprenticeship or traineeship progression provisions of this Award may be dealt with in accordance with the dispute resolution clause.

- (c) For the purposes of this Schedule, the training package containing the qualification specified in the Training contract for the apprenticeship or traineeship, sets out the assessment requirements for the attainment of the units of competency that make up the qualification. The definition of “competency” utilised for the purpose of the training packages and for the purpose of this Schedule is the consistent application of knowledge and skill to the standard of performance required in the workplace. It embodies the ability to transfer and apply skills and knowledge to new situations and environments.
- (d) The apprentice or trainee will be paid the wage rate referred to in this Schedule from the first full pay period to commence on or after the date on which an agreement or determination is reached in accordance with this Schedule or on a date as determined under the dispute resolution process in paragraph (b).
