2.1.1 As part of a process of improvement in productivity and efficiency, discussion should take place at each enterprise to provide more flexible working arrangements, improvement in the quality of working life, enhancement of skills, training and job satisfaction and to encourage consultative mechanisms across the workplace.

3.1 Grievance and dispute settling procedure

The matters to be dealt with in this procedure shall include all grievances or disputes between an employee and an employer in respect to any industrial matter and all other matters that the parties agree on and are specified herein. Such procedures shall apply to a single employee or to any number of employees.

- 3.1.1 In the event of an employee having a grievance or dispute the employee shall in the first instance attempt to resolve the matter with the immediate supervisor, who shall respond to such request as soon as reasonably practicable under the circumstances. Where the dispute concerns alleged actions of the immediate supervisor the employee/s may bypass this level in the procedure.
- 3.1.2 If the grievance or dispute is not resolved under clause 3.1.1, the employee or the employee's representative may refer the matter to the next higher level of management for discussion. Such discussion should, if possible, take place within 24 hours after the request by the employee or the employee's representative.

- 3.1.4 If the grievance or dispute is still unresolved after discussions mentioned in clause 3.1.2, the matter shall, in the case of a member of a Union, be reported to the relevant officer of that Union and the senior management of the employer or the employer's nominated industrial representative. An employee who is not a member of a Union may report the grievance or dispute to senior management or the nominated industrial representative. This should occur as soon as it is evident that discussions under clause 3.1.2 will not result in resolution of the dispute.
- 3.1.5 If, after discussion between the parties, or their nominees mentioned in clause 3.1.4, the dispute remains unresolved after the parties have genuinely attempted to achieve a settlement thereof, then notification of the existence of the dispute is to be given to the Commission in accordance with the provisions of the Act.
- 3.1.6 Whilst all of the above procedure is being followed, normal work shall continue except in the case of a genuine safety issue.

Following such agreement being reached, the employee shall convert to full-time or part-time employment.

Where, in accordance with clause 4.3.2(d) an employer refuses an election to convert, the reasons for doing so shall be fully stated to and discussed with the employee concerned and a genuine attempt made to reach agreement.

Any dispute about the arrangements to apply to an employee converting from casual employment to full-time or part-time employment shall be dealt with as far as practicable with expedition through the grievance procedure.

The provisions of clause 4.9 will not apply to employees of Queensland Government departments or agencies to the extent that the provisions of the redundancy arrangement are contained in a Directive issued by the Minister responsible for industrial relations pursuant to section 54 of the *Public Service Act 2008*, where the Directive provides for entitlements that are superior to those in clause 4.9.

- (a) Where an employer decides that the employer no longer wishes the job the employee has been doing to be done by anyone, and this is not due to the ordinary and customary turnover of labour, and that decision may lead to termination of employment, the employer shall consult the employee directly affected and where relevant, their Union or Unions.
- (b) The consultation shall take place as soon as it is practicable after the employer has made a decision, which will invoke the provisions of clause 4.9.1(a) and shall cover the reasons for the proposed terminations, measures to avoid or minimise the terminations and/or their adverse affects on the employees concerned.

- (b) The employer may, at the employer's option, make payment in lieu thereof of an amount equal to the difference between the former amounts the employer would have been liable to pay and the new lower amount the employer is liable to pay the employee for the number of weeks of notice still owing.
- (c) The amounts must be worked out on the basis of:
 - (i) the ordinary working hours to be worked by the employee; and

- (ii) the amounts payable to the employee for the hours including for example, allowances, loadings and penalties; and

5.4 Classification definitions and skill based career paths

Summary

This Award provides for a classification structure where employees are classified according to the level of competency that they hold and are required to use in their work.

The classification definitions provide descriptors of the nature of work performed at each level. Where there is a query about the classification of an employee, their classification should be determined in accordance with the National Metal and Engineering Competency Standards Implementation Guide. A copy of the guide can be downloaded at www.mskills.com.au.

The classification structure provides that employees are classified on the basis of the level of competency they have and the competency they are required to use in their employment. Competency can be shown by formal qualifications or by the actual exercise of skills. For example, an employee who is required to use skills that give him/her 64 points of competency, that employee must be classified at C11, even though they do not hold a formal qualification. The Implementation Guide and clause 5.5 of this Award prescribe how the classification and level of competency of an employee can be determined

If an employee holds the minimum training requirement for a particular classification level in the Award, and they are required by the employer to use or will be required by the employer to use those skills in their job, then they cannot be classified below that particular classification level. For example, a person who holds a trade certificate and is required to use those skills cannot be classified below the C10 Classification.

In 1997, the Metal and Engineering Training Package introduced a new range of qualifications, aligned to the Australian Qualifications Framework, which use competency standards as the basis of a training qualification. These new qualifications have been accepted as replacements for the previous module-based courses. However, qualifications, including modules, achieved prior to the introduction of the Metal and Engineering Training Package can be used for classification under this Award.

The classification structure can be summarised as follows:

Number	Classification Title	Minimum Training Requirement	Recommended Points
